

Steel Statistical Yearbook  
**2020** concise version

A cross-section of  
steel industry statistics  
2010 - 2019

## Preface

This yearbook presents a cross-section of steel industry statistics that are exchanged or published by the World Steel Association (worldsteel).

The willing co-operation of both members and non-members alike in supplying the information included in this publication is gratefully acknowledged.

Further details of the statistical sources used are given in the Annex (p.40). These contents were finalised in November 2020.

Data are expressed in thousand metric tons unless stated otherwise.

Zero indicates that the quantity concerned is less than 500 tonnes.

'e' beside a figure indicates that the figure that has been estimated by worldsteel.

'(e)' following a country name indicates that the series has been estimated by worldsteel.

Totals comprise listed countries only. Trade data totals include intra-regional exports and imports.

Three dots (...) indicate that an item of information was not available.

**Definitions**

Crude steel is defined as steel in its first solid (or usable) form: ingots, semi-finished products (billets, blooms, slabs), and liquid steel for castings. This is not to be confused with liquid steel, which is steel poured.

Hot rolled (hr) products (hr long products, hr flat products, seamless tubes) are products of first transformation. These products may be further worked to produce cold rolled-, coated-, and tubular products (except seamless tubes).

For further definitions of traded products please consult chapters 72 and 73 of the Harmonised System (HS).
